- 1.Im running because I feel what I have to offer is needed within district 5. If elected my top goals are rent control, more shelters for the homeless, and entrepreneurship development with access to funding.
- 2.Opening up more shelters and providing funding to current shelters will prevent a lot, if not all public sleeping.
- 3. I believe enhancing policing and security during all peak bar/restaurant hours would help with safety in downtown area.
- 4. To balance the new vision for downtown, while continuing to support existing downtown businesses, I would develop strategies to meet the diverse needs of everyone. By promoting and ensuring that the family friendly vision for downtown is accessible to everyone in the community.
- 5. To me a lot of those affordable housing developments aren't as affordable when people still have to show they earn three times the rent. I would like to develop more sustainable living homes for low-income families.
- 6. I wasn't a resident of Parramore, but growing up, I would visit Parramore village every weekend. I think we should maintain some of the architectural character of Parramore by implementing some of its historical landmarks in new changes.
- 7. To ensure that the new \$500 million entertainment complex doesn't just bring in tourism, I would integrate existing local businesses, along with the new entertainment. Which would help and bring more job opportunities for those within district 5.
- 8. Being a cancer survivor I'm all for healthier eating. So, I would eliminate the food dessert in district 5, with the views of the community, and bringing in more fresh produce foods through
- 9. To change the perception of the Parramore community when it comes to crime, I would be accessible by attending the neighborhood meetings to help develop safety measures. Promote community cohesion and safety.
- 10. To get the parents to engage, to address the crime issues within district 5, I would put in place parenting workshops. So they can have the tools, resources and strategies to effectively support their children. If the children are supporting the crime rate would decrease.
- 11. To clean up district 5, I would establish a community health monitoring program to keep track of the residents living within Orlando Gasification Plant and Griffin Park, and asses the health outcome. I would also implement a cleanup plan. That would include groundwater treatment, and the removal of hazardous materials to restore environmental quality.

- 12. To increase accessibility to parks and other recreational activities for youth, I would involve the youth and community members in on planning. Create opportunities that would allow youths to participate in the maintenance and programming of parks and recreational facilities.
- 13. If Regina Hill is reinstated, I plan to run again for the opening seat for reelection in 2025.
